TRAVEL HEIGHT	Up to 12m
LOAD	250 kg - 450kg
MAX NUM. STOPS	4
TRAVEL MAX.	10m
SPEED MAX.	0.15 m/s - 0.5 m/s

Features and Technical Data

Eco-Efficient Technology

The eco-friendly choice is an oil-free system, thanks to MRL technology (machine roomless) no extra space is required beyond the shaft.

Safety Devices and Batteries

The technical features reflect the most advanced technology. Full-height photocell barriers and backup batteries allow the lift to return to the landing and open the doors in case of electric power failure.

Upgrade

Home Lift is designed to withstand the test of time. All the cabin details allow upgrades in the finishes, replacement of parts, and the implementation of materials without disassembling the entire system. This option adds value and makes customisation easy and safe.

Comfort and Silence

The inverter provides a gentle and controlled departure and arrival. Traveling in comfort, the Simplex Home Lift is silent when operating: all the construction details, such as the low placement of the motor, the quality of the cabin structure, and the door mechanism, are designed to reduce vibrations and keep noise to a minimum.

Fast Installation and Maintenance

From the packaging to the pre-wiring, every step is dedicated to focusing on the quality of the installation. In the case of two stops in a masonry shaft, it can be installed in one week.

TAILOR YOUR LIFT

WHAT SERVICES DO WE PROVIDE?

INSTALLATION

Installation options are endless with either our standardised range or our tailor-designed and manufactured equipment to meet a specific development requirement or custom solution need.

MAINTENANCE

To ensure your Home Lift continues to operate at its optimum, we offer cost-effective, tailored maintenance plans and services with one of our trained Elevators technicians.

MODERNISATION

Give your Home Lift a new lease on life with multitude of modernisation and upgrade options. If modernisation is an option for your equipment, it can be a cost-effective alternative to replacing the lift with another product.

REPAIR

Should you experience an unplanned equipment failure, know you're in good hands with streamline Elevator's 24/7 emergency response unit. Our technicians will locate the problem, resolve the issue and recommend further action to prevent future disruptions.

If you have any question, please do not hesitate to get in touch.
